○ Possible INNLANC future cooperation (Adél Csernovitz)

In general, Adél noticed that most of the INNLANC members are interested in a common project and nearly all members could relate to the topic "Promoting inclusive foreign language learning". As for this particular topic, Norway and Austria would be interested in teaching materials; Hungary could organise a pilot training course; Finland could offer insights into Finnish experiences; France and Sweden supports this topic but they need more information to continue thinking about a project.

It seems that Erasmus + KA3 Policy Experimentation would be a suitable call for INNLANC but we need to know more about the requirements. At the moment there is only a very short summary of objectives on the EACEA website see below.

"Erasmus + Prospective initiatives - European policy experimentations aims to support transnational cooperation with a view to implement innovative policies under the leadership of high-level public authorities.

The action pursues the following objectives:

- Test and improve policy implementation systems, structures and processes, with a potentially significant impact
- Facilitate the collection and analysis of substantive evidence allowing the responsible public authorities to assess and monitor the implementation of innovative policies
- Identify key criteria and conditions for effective policy implementation and monitoring
- Facilitate transferability and scalability"
