

NIK 2025: call for papers

The Norwegian Informatics Conference (NIK) is a broad national conference aimed at being an important national venue for discussions, networking, and dissemination of research and advanced development work in informatics and computer science. NIK is part of NIKT (the Norwegian ICT Conference for Research and Education). This year's edition shall include one session consisting of invited presentations from Norwegian industries, to further promote the exchange of ideas and exposition of open problems.

The scope of NIK covers all areas of informatics, and theoretical and applied computer science. NIK accommodates interdisciplinary work and diversity in scientific approaches and application areas.

We invite three categories of submissions:

- Research papers, original contributions, up to 10 pages,
- Work-in-progress papers, original contributions of late-breaking results, up to 4 pages,
- Extended abstracts, advertising previously published results, up to 2 pages.

Research papers and Work-in-progress papers will go through the full peer-review process, and those accepted shall be published, in a volume of the open access [journal of the Norwegian ICT conference for research and education](#). The proceedings has its own ISSN number and is approved as a scientific publication channel at level 1.

Extended abstracts will be reviewed by the program committee, and will not be part of the conference proceedings. However, authors of accepted abstracts will be given the option of archival in a supplement to the above-mentioned journal.

Desk rejection will be applied to papers that have no reasonable overlap with the declared scope of the conference, and to papers that do not have at least one author with some proximity to Norwegian Academia or Industry.

Accepted papers must be orally presented at the conference. At least one author must therefore register to attend the conference. The paper and presentation can be in Norwegian, in another Scandinavian language, or in English.

Generative AI: The use of AI systems to generate text for inclusion in a submission is only allowed if its role is properly documented in the manuscript (e.g., when reporting on experiments on such systems). However, the use of AI-powered systems to assist with the polishing of human-authored text is permissible.

SUBMISSION

Submitted papers must be formatted according to LNCS Springer Computer Science Proceedings style:

<https://www.springer.com/gp/computer-science/lncs/conference-proceedings-guidelines>

The page limits for the mentioned categories do include references. Submission is to be done via EasyChair on the following link:

<https://easychair.org/conferences/?conf=nikt2025>

IMPORTANT DEADLINES

- Abstract: 10 September, 2025 (abstract submission at this stage is optional)
- Full paper submission: 17 September, 2025
- Notification of acceptance: 18 October, 2025
- Camera-ready paper: 1 November, 2025
- Registration: 1 November, 2025
